## Projects

### TimeNet-web | Master's Research Project

Contributed to TimeNET-web, a browser-based Petri net modeling and analysis tool.

- Implemented a new login management interface and access control system using PHP.
- Made the property bar fully responsive to ensure smooth resizing without affecting other elements using JavaScript.
- Enhanced the UI with responsive overlays and smooth transitions for seamless in-place editing.

### CityLens | React and Tailwind | Portfolio

Explore any city instantly — see the weather, map, and Wikipedia info, all in one place!

- **Weather Info:** View current weather for any city via a weather API.
- **Map Location:** See the city's location on an interactive map using OpenStreetMap/Nominatim.
- **Wikipedia Info:** Read a short overview of the city fetched dynamically from the Wikipedia API.

### Pizza-Hub | PHP and Material UI | Portfolio

- Full-stack Pizza App – A complete dashboard to manage pizzas and track recent, total, and pending orders, with options to add, edit, or delete items easily.

## Professional Experience

### Frontend Developer - Working Student, IONOS SE

07/2023 – Present | Karlsruhe, Germany

- Turned UI/UX designs into responsive user interfaces for the IONOS Personalization Engine.
- Enhanced user experience by adding interactivity and animations using JavaScript.
- Utilized React to enable TYPO3 media browser debugging within the IONOS browser extension.

### Internship - TYPO3 Developer, IONOS SE

04/2024 – 06/2024 | Karlsruhe, Germany

- Developed TYPO3 Ad templates for the IONOS Control Panel to showcase new services using HTML, CSS, and JavaScript.
- Created UI elements like banners, cards, landing pages, Overlays, and footers.
- Made template management easy for the sales team by using Mask templating in Typo3 Fluid.
- Improved workflow, reduced errors, and increased flexibility.
- Ensured consistent and high-quality designs for marketing campaigns.
