PROFESSIONAL SUMMARY

Full-stack developer with 4+ years of experience in React, Next.js, PHP, and Laravel. Skilled in combining strong frontend design with efficient backend development to build responsive, data-driven websites. Experienced in TYPO3 Fluid and WordPress customization.

Employment

Jul 2023 – Current

Frontend Developer IONOS SE (Working Student - Part time)

- Developed graphical user interfaces based on Figma designs for IONOS Personalization Engine.
- Implemented responsive designs, mobile optimizations, and advanced SEO strategies.
- Built and debugged TYPO3 media browsing features in the IONOS browser extension using React and advanced state management hooks.
- Resolved plugin conflicts and technical issues while ensuring seamless user experiences.
- Collaborate with cross functional teams using Jira and GitHub to deliver on-time projects.

Apr 2024 – Aug 2024

TYPO3 Developer IONOS SE (Internship - Full time)

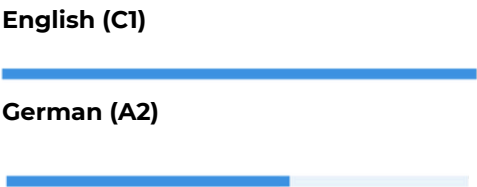

- Developed TYPO3 Ad templates for the IONOS Control Panel and Hotline tool to showcase new services, significantly boosting seasonal campaign sales.
- Managed TYPO3 websites, customized plugins, and ensured pixel-perfect responsiveness for ad placements in different campaigns.
- Built responsive UI components, including landing pages, overlays, cards, stripes, and footers using HTML, JavaScript, and the Exos CSS library.
- Ensured consistent, high-quality designs across all marketing campaigns.

Education

Master of Science in Research in Computer & Systems Engineering Technische Universität Ilmenau, Germany 2021 – Current

Bachelor of Science in Information Technology University of Malakand, Pakistan 2011 – 2015

Languages

Projects

TimeNET-web

University Research Project

Contributed to TimeNET-web, a browser-based Petri net modeling and analysis tool.

- Implemented a new login management interface and access control system using PHP.
- Made the property bar fully responsive to ensure smooth resizing without affecting other elements using JavaScript.
- Enhanced the UI with responsive overlays and smooth transitions for seamless in-place editing
- **Tech:** PHP and Vanilla JavaScript

CityLens

Portfolio Project

Explore any city instantly — see the weather, map, and Wikipedia info, all in one place!

- **Weather Information:** Fetched the current weather for any searched city through a weather API.
- **Map Location:** View the city's location on an interactive map using OpenStreetMap/Nominatim.
- **Wikipedia Info:** Read a short overview of the city fetched dynamically from the Wikipedia API.
- **Tech:** React and Tailwind CSS
- **Link:** <https://www.citylens.nasirkhan.tech/>

Pizza Hub

Portfolio Project

Full-stack Pizza App

- A complete dashboard for the backend to manage pizzas and track recent, total, and pending orders, with options to add, edit, or delete items easily.
- Developed simple, clean, and modern UI for the frontend.
- **Tech:** PHP and MUI
- **Link:** <https://github.com/Nk6513/Pizza-Hub>
